Diego Mesquita

School of Applied Mathematics
Getulio Vargas Foundation
Rio de Janeiro (RJ), Brazil

Education

2021, Doctor of Science, Computer Science, Aalto University, Finland;
2017, Master of Science, Computer Science, Federal University of Ceará, Brazil;
2016, Bachelor of Science, Computer Science, Federal University of Ceará, Brazil.

Work experience

2026-present, Associate professor (*professor associado*), Getulio Vargas Foundation, Brazil;
2022-2026, Assistant professor (*professor adjunto*), Getulio Vargas Foundation, Brazil;
2017-2021, Doctoral researcher, Aalto University, Finland.

Awards and honours

2025-present, Research Productivity Fellowship (PQ-C), CNPq, Brazil
2023-present, Young Scientist of Our State (JCNE), FAPERJ, Brazil

Teaching

Since 2022, I have taught advanced machine learning classes for undergrad students in data science and applied mathematics at the Getulio Vargas Foundation. I have also taught courses in deep generative models at the same institution's doctoral programme in mathematical modelling and data science.

Research Supervision and Leadership Experience

I lead a growing research group at FGV, comprising 2 post-docs, 3 PhD students, 6 MSc students, and 4 undergrad research assistants.

I have advised hundreds of exceptional undergrad students (high school mathletes) in fast-tracking their graduate studies as the FGV coordinator of the PICME programme.

I have coordinated one research consortium funded by the CNPq among a number of other projects financed by the FAPERJ, FAPESP, CNPq, and SVCF.

I have been elected a member of the Brazilian Computer Society's special committee on AI (CEIA) for the 2025-2026 biennium.

Graduate alumni

2024, Tiago da Silva (PhD, FGV EMAp)
2024, Alan Matias (PhD, UFC) *co-supervised*

2026, Pedro Dall'Antonia (MSc, FGV EMAp)
2026, Leonardo Belo (MSc, FGV EMAp)
2024, Tiago da Silva (MSc, FGV EMAp)
2024, Mariana Neves (MSc, FGV EMAp)

Post-doc advisory
2024-present, Saullo Haniel (FGV EMAp)
2024-present, Ana Tenório (FGV EMAp)
2025-2025, Tiago da Silva (FGV EMAp)
2022-2024, Eliezer Silva (FGV EMAp)
2023-2024, Jamille Feitosa (FGV EMAp)

Selected publications
Opposite to other areas of science, the most prestigious publication venues in computer science are peer-reviewed conferences (see, e.g., csrankings.org). For a comprehensive list of publications, check my Google Scholar profile.

Avoid What You Know: Divergent Trajectory Balance for GFlowNets, 2026 (ICML)
P. Dall'Antonia, T. da Silva, D. Csillag, S. Lahlou, D. Mesquita.

Cooperative Sheaf Neural Networks, 2026 (ICLR)
A. Ribeiro, A. Tenório, J. Belieni, A. Souza,D. Mesquita.

Differentiable Lifting for Topological Neural Networks, 2026 (ICLR)
J. Franco, G. Duarte, A. Nikitin, M. Ponti, D. Mesquita, A. Souza.

On the Identifiability of Tensor Ranks via Prior Predictive Matching, 2026 (AISTATS)
E. da Silva, A. Klami, D. Mesquita, I. Urteaga.

Boosted GFlowNets: Improving Exploration via Sequential Learning, 2026 (AISTATS)
P. Dall'Antonia, T. da Silva, D. , D. de Souza, C. Mattos, D. Mesquita.

Differentially Private E-values, 2026 (AISTATS)
D. Csillag, D. Mesquita.

Infinite Neural Operators: Gaussian Processes on Functions, 2025 (NeurIPS)
D. de Souza, Y. Zhu, H. J. Cunningham, Y. Saporito, D. Mesquita, M. P. Deisenroth.

Differentially Private Selection using Smooth Sensitivity, 2025 (IEEE S&P)
I. Chaves, V. Farias, A. Perez, D. Mesquita, J. Machado.

Generalization and Distributed Learning of GFlowNets, 2025 (ICLR)
T. da Silva, A. Souza, O. Rivasplata, V. Garg, S. Kaski, D. Mesquita.

When do GFlowNets learn the right distribution?, 2025 (ICLR)
T. da Silva, R. Alves, E. da Silva, A. Souza, V. Garg, S. Kaski, D. Mesquita.

Streaming Bayes GFlowNets, 2024 (NeurIPS)
T. da Silva, D. de Souza, D. Mesquita.

On Divergence Measures for Training GFlowNets, 2024 (NeurIPS)
T. da Silva, E. Silva, D. Mesquita.

Meta-analysis of Bayesian analyses, 2024 (Bayesian Analysis)
P. Blomstedt, D. Mesquita, O. Rivasplata, J. Lintusaari, T. Sivula. J. Corander, S. Kaski.

Amortized Variational Deep Kernel Learning, 2024 (ICML)
A. Matias, C. Mattos, J. Gomes, D. Mesquita.

Embarrassingly Parallel GFlowNets, 2024 (ICML)
T. da Silva, A. Souza, L. Carvalho, S. Kaski, D. Mesquita.

Thin and deep Gaussian processes, 2023 (NeurIPS)
D. de Souza, A. Nikitin, S. T. John, M. Ross, M. A. Álvarez, M. P. Deisenroth, J. Gomes, D. Mesquita, C. Mattos.

Distill n' Explain: explaining graph neural networks using simple surrogates, 2023 (AISTATS)
T. Pereira, E. Nascimento, L. Resck, D. Mesquita, A. Souza.

Provably expressive temporal graph networks, 2022 (NeurIPS)
A. Souza, D. Mesquita, S. Kaski, V. Garg.

Parallel MCMC without embarrassing failures, 2022 (AISTATS)
D. de Souza, D. Mesquita, S. Kaski, L. Acerbi.

Federated stochastic gradient Langevin dynamics, 2021 (UAI)
K. El Mekkaoui, D. Mesquita, P. Blomstedt, S. Kaski.

Rethinking pooling in graph neural networks, 2020 (NeurIPS)
D. Mesquita, A. Souza, S. Kaski.

Learning GPLVM with arbitrary kernels using the unscented transformation, 2020 (AISTATS)
D. de Souza, D. Mesquita, J. Gomes, C. Mattos.

Parallel MCMC using deep invertible transformations, 2019 (UAI)
D. Mesquita, P. Blomstedt, S. Kaski.
